

Pet-Friendly Houseplants

Although we do not condone your pets eating your plants, below is a list of safer options if you have critters that nibble. Some plants can still make them a little queasy, the same as if they ate a bunch of grass outside. Be sure to have the correct botanical name when choosing plants, many plants go by the same common name.

(spp. Abbreviation for multiple species)

- African Violets - *Saintpaulia ionantha*
- Areca Palm – *Dyopsis lutescens*
